EXPERIENCE

User Experience Engineer Comcast — Experience Design Prototyping

March 2018 – Present

- Working closely with the Comcast Design team to create high fidelity prototypes for the X1 Platform, the Xfinity Voice Remote, Xfinity Home, and Xfinity Stream
- Created prototypes in various frameworks and languages including React, Polymer, Unity, and Java
- Utilizing hardware solutions like Arduino, Adafruit, and Raspberry Pi to create product features for the Industrial Design Team
- Bridging communication and mutual understanding of product capabilities between design and development teams
- Building internal design tools that empower brand cohesion across the design department and Xfinity product teams
- User testing prototypes to reinforce observations and improve Xfinity product features

User Experience Designer Comcast — Xfinity Design Standards

January 2017 – February 2018

- Updated the architecture and developed design.comcast.com in a Node environment to create an expansive view of Comcast's Experience Design Department, including blog posts, featured awards and product standards
- Collaborated on the creation of UI Kits utilized by both product and development teams
- Created companywide product design language and standards and established rules for multiple components used across 10+ Xfinity products
- Used Sketch and Adobe Creative Suite design tools to create concepts and mockups for Executive Leadership
- Worked closely with outside agencies to design and update monthly department newsletter

Associate Adjunct Professor Temple University — Quality Assurance & Testing

January 2017 – May 2018

- Created weekly slides and lesson plans based on course syllabus and curriculum.
- Oversaw the planning, posing and grading of weekly labs and assignments for 20-35 students each semester
- Collaborated with other course professor to assess and grade students final presentations
